# WRITE STUFF

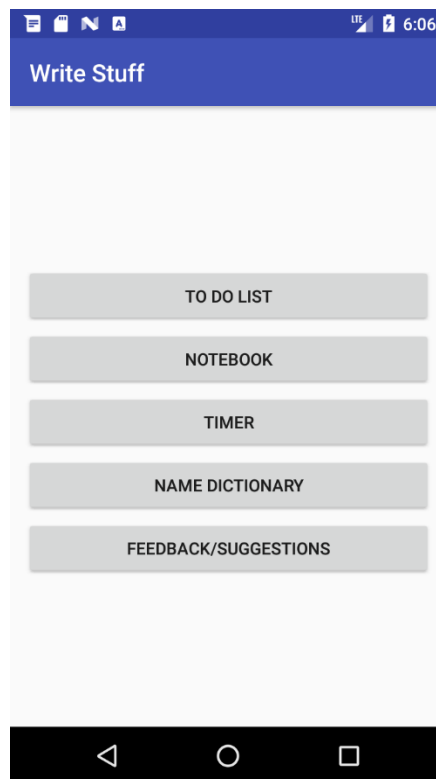

---

## Introduction

Write Stuff was written with the writer on the go in mind. Write Stuff features a To Do list to keep you organized, a Notebook to jot down those ideas that come to you in the middle of the night or while walking through town, a name dictionary to help choose names for characters, and a timer to make sure you're putting in your writing time every day.

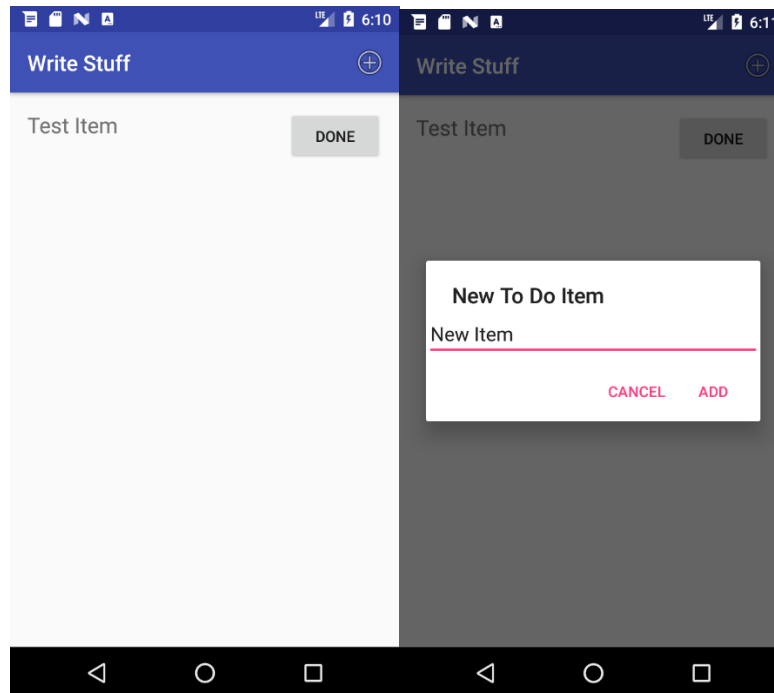

Write Stuff might not be able to write the next great American novel for you, but with this app, you can become organized enough to write it yourself.

Write Stuff was written and tested with API 24 Nougat.

## Start Screen

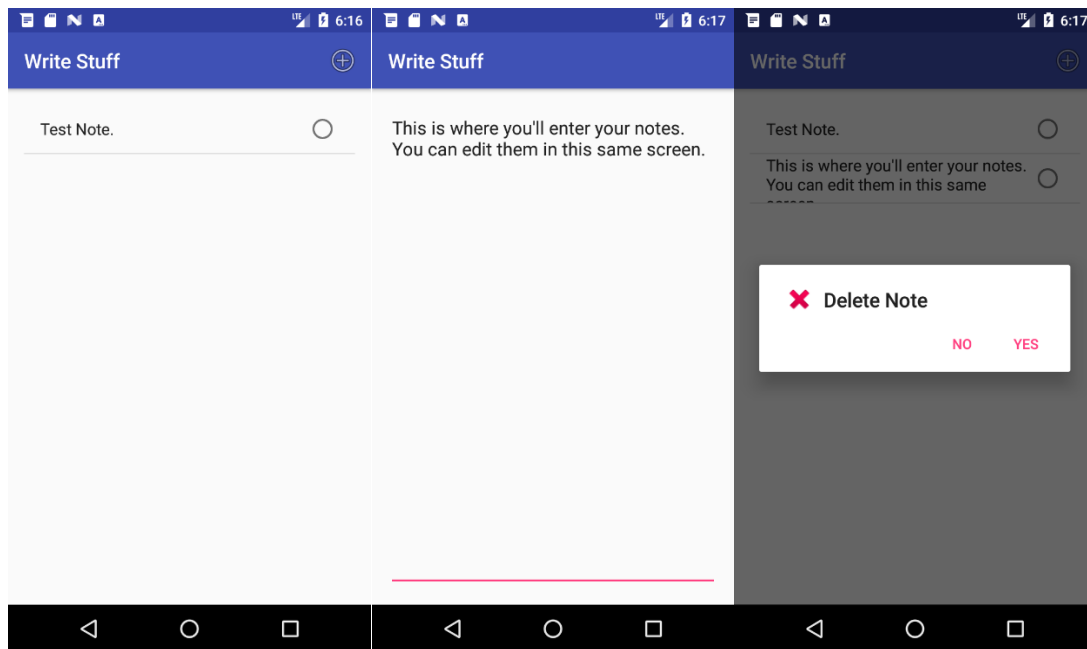

The application opens on a menu listing all the activities you can do while in Write App. This has been kept simple to keep the writer focused on the task at hand.

## To Do List

The Write Stuff To Do list features a simple design that allows a writer to jot a quick item for their to do list and erase it once the item has been completed.

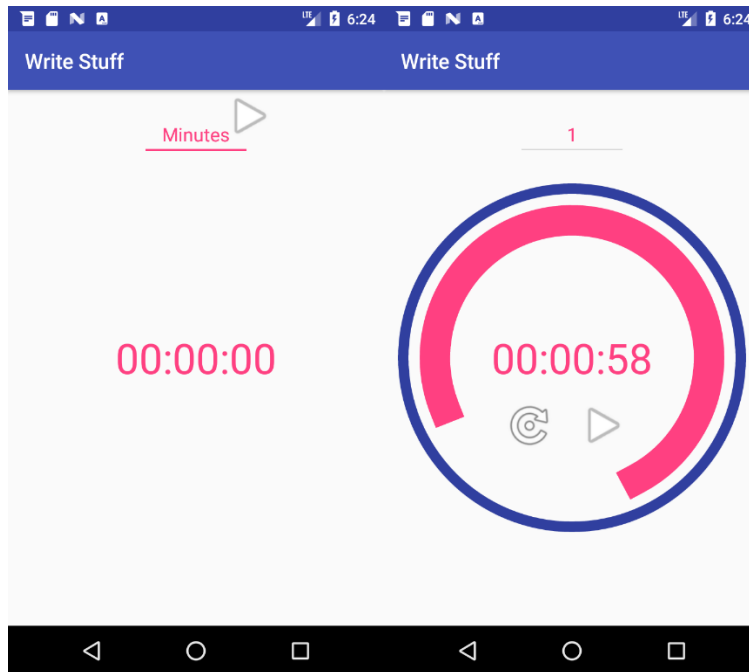

To **Add** an item, simply click the plus sign in the upper right-hand corner and fill out the **New To Do Item** prompt that appears. Click **Add** and it will appear in the list. If you decide not to add the item, simply hit **Cancel** and the prompt will go away. Once an item is complete, you can **Delete** the item by clicking **Done**.

## Notebook

Having a notebook on hand to write down your ideas is a writer's best friend. The Write Stuff app features the next best thing to a physical notebook and one that you'll rarely leave home without.

To **Add** a note, simply click the plus sign in the right-hand screen and type whatever you'd like in the text editor that appears. You can **load** saved notes by touching the preview in the list screen. Once you no longer need the note, you **delete** the note by simply holding down on the preview of the selected list and hitting **Yes** on the prompt that loads. Select a note by mistake to delete? Just hit **No** and no action will be taken.

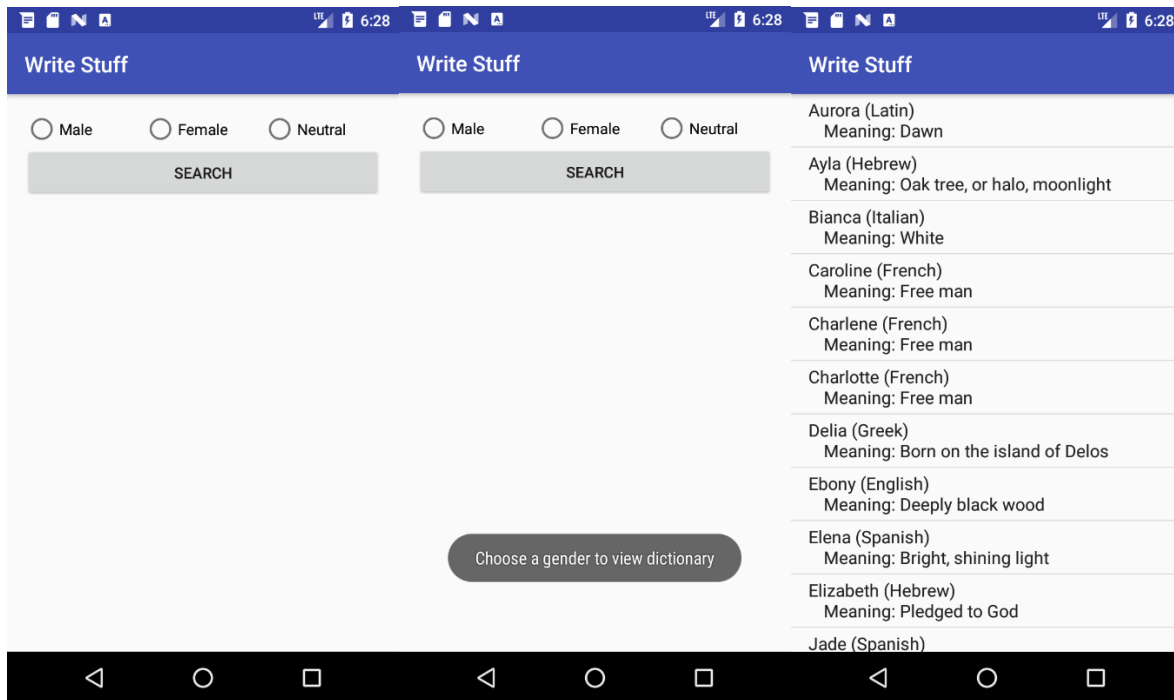

## Timer

You will get nowhere with your writing if you don't devote time to it. The Timer portion of this app allows you to designate a set amount of time for writing.

To **Start** the timer, put the number of minutes you want to write for and hit the play button. If you get distracted and need to start again, select **Reset**. You can **Stop** the timer by hitting the start button again. When you've finished your designated writing time, the app will let you know through thunderous **applause**.

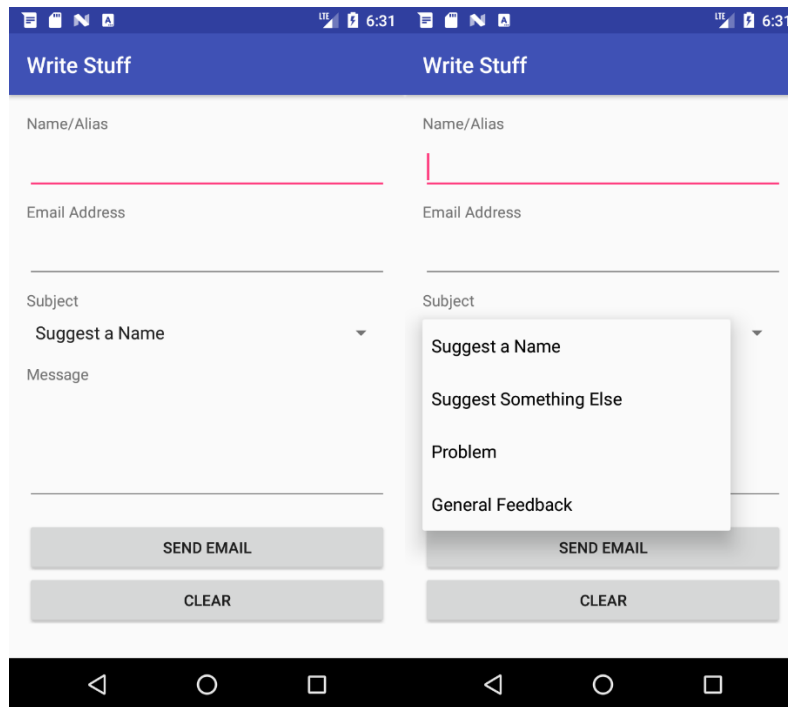

Congratulations! You've done your writing for the day!

## Name Dictionary

Finding the perfect name for your characters can be a struggle. The Name Dictionary portion of this application is sorted by gender and alphabetically to help you find that perfect name.

To **Search** simply select a gender and hit the **Search** button. The **Dictionary** appears. Hit the **Back** button to search again.

## Feedback/Suggestions

Write Stuff is an application that is constantly seeking to grow. User Feedback is how we intend to do that. Simply send us an email with the form so we can hear your thoughts. There are four types of emails that users can send to us.

**Suggest a Name:** Is your favorite name missing from the dictionary? Send the name, origin, and meaning and we'll add it with the next update. Don't know the origin or definition? No problem. Our highly trained team of research specialists will find the meaning and get it in there.

**Suggest Something Else:** Is there a functionality you wish the app had? Send in your suggestions. We can't promise that every suggestion will be implemented, but we love to hear your thoughts.

**Problem:** Uh oh! Did something go wrong with the app? Let us know and we'll be glad to fix it.

**General Feedback:** Send us anything you'd like here.
